Why invest in precious stones?

- ✓ **Price development**
Stable growth in value over the last 15 years:
higher than gold or diamonds.
- ✓ **Significance in the market**
Global demand and annual trade volume
exceeding **USD 15 billion.**
High liquidity through auction houses and
specialist dealers.
- ✓ **Diversification**
Physical asset: stability in periods of economic
uncertainty, asset protection.

Nejlepší investiční drahokamy

Sapphire

- Price growth: on average +18% over the last decade
- High popularity in the luxury jewellery industry and among collectors

Emerald

- Colombian emerald: most sought after for its rich colour
- Average growth in value: stable and long-term

Ruby

- Exclusive color "pigeon's blood", auction records high above diamond prices
- Prices rising due to limited deposits in Burma (Myanmar)

Tanzanite

- Unique site in Tanzania, discovered in the 1960s
- Demand is increasing due to its exotic colour and rarity

Gemstones – Business volume in figures

Globální trh s drahokamy

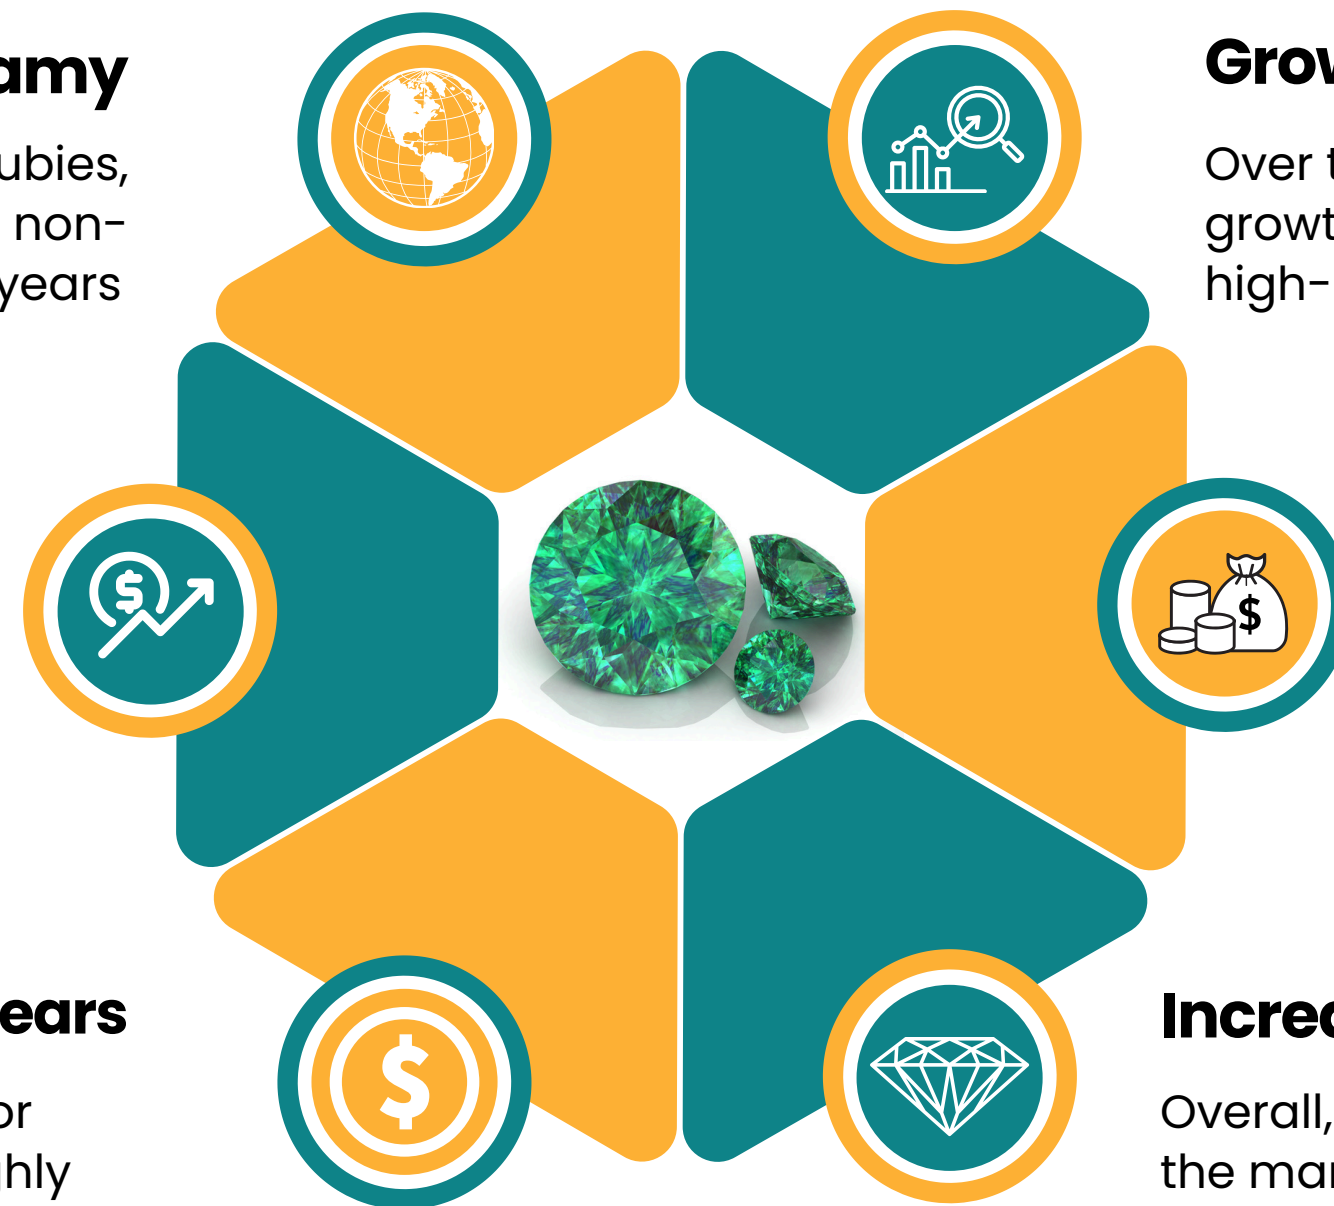

The global market for precious stones, i.e. rubies, sapphires, emeralds, tanzanites and other non-diamond gems has been moving in recent years in **the range of \$10–15 billion per annum.**

Stable market growth

The market is showing steady growth; sources (e.g. GIA reports) report year-on-year growth in the range of 5–8% depending on the investment gems and jewellery segment

Trade volume over 10 years

10 years ago, the size of the global market for investment gems was estimated to be roughly **USD 8 billion**

Growing demand

Over the past 10 years, there has been significant growth in demand from consumers (luxury and high-end jewellery), and investors

Volume of 15 billion USD

Between 2020 and 2024, business volumes have stabilised at around \$15 billion, with this trend continuing

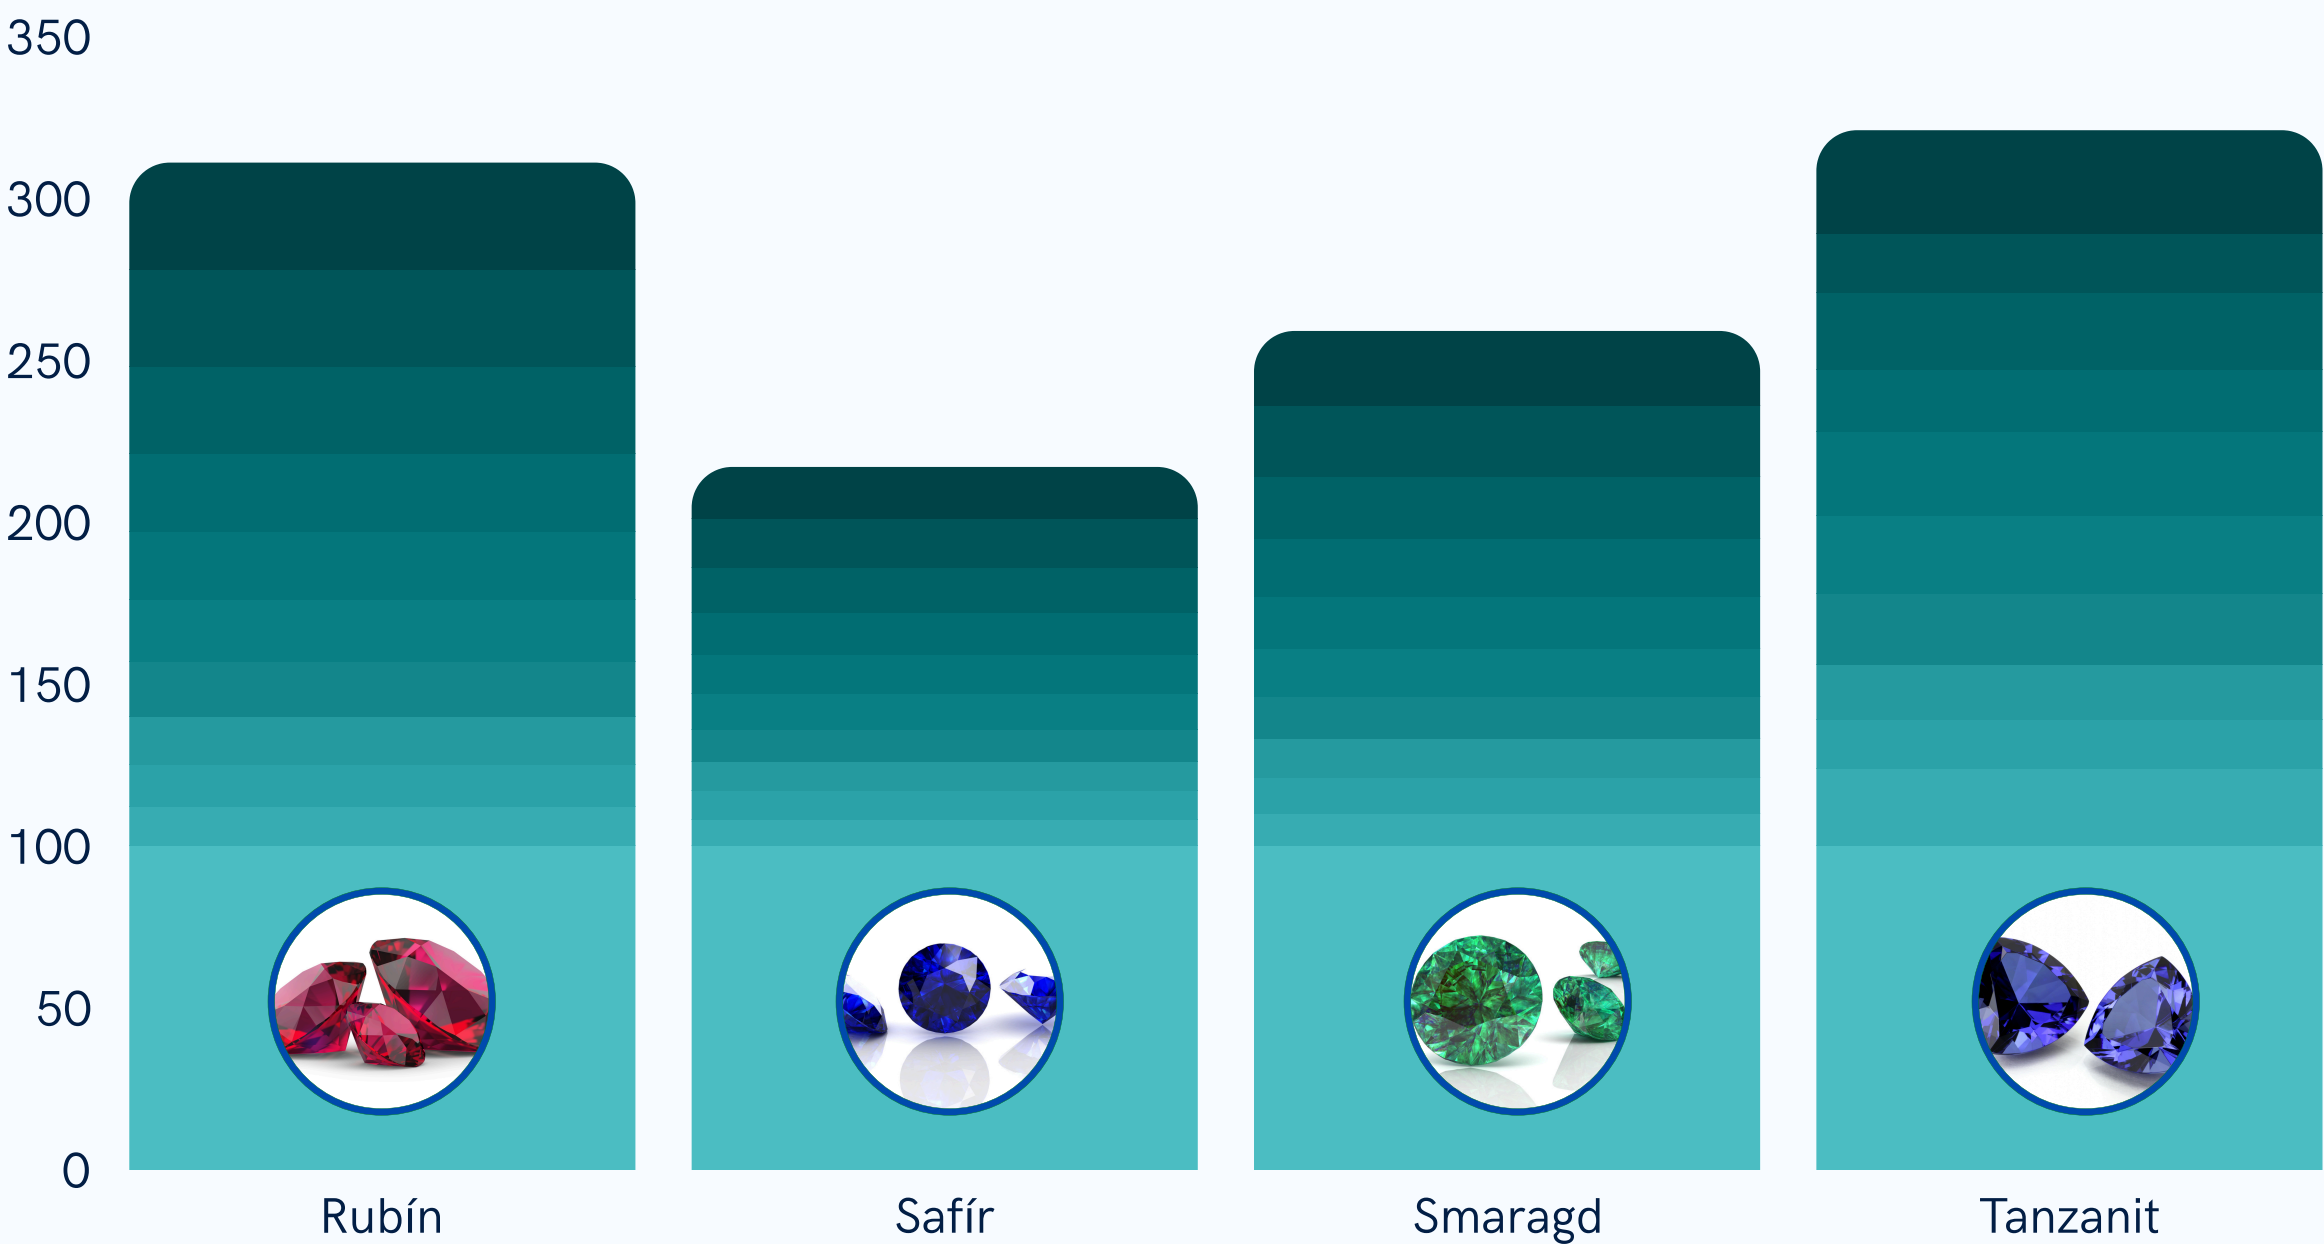

Increase in the volume of trade in gemstones

Overall, we can say that over the last 10 years the market for precious and investment jewellery has roughly doubled its volume

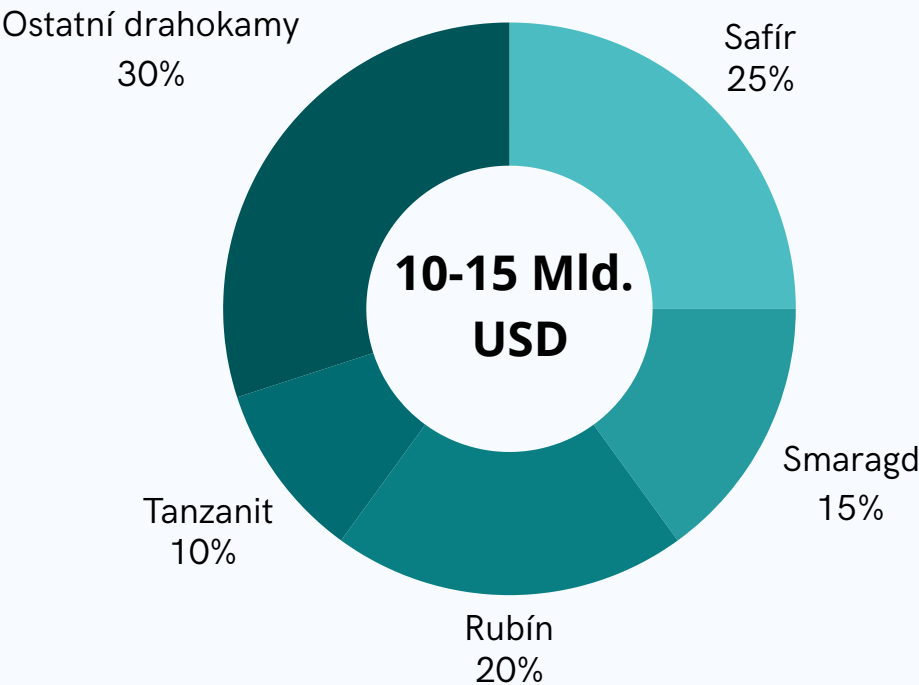

Price development of precious stones over the last 10 years

Over the last ten years, the most desirable investment gems have seen significant appreciation: these figures clearly show how strong and long-lasting an investment commodity gems are.

The world's gemstone trade volume is in the range of USD 10-15 billion per year.

Share of trade volume in the gemstone market

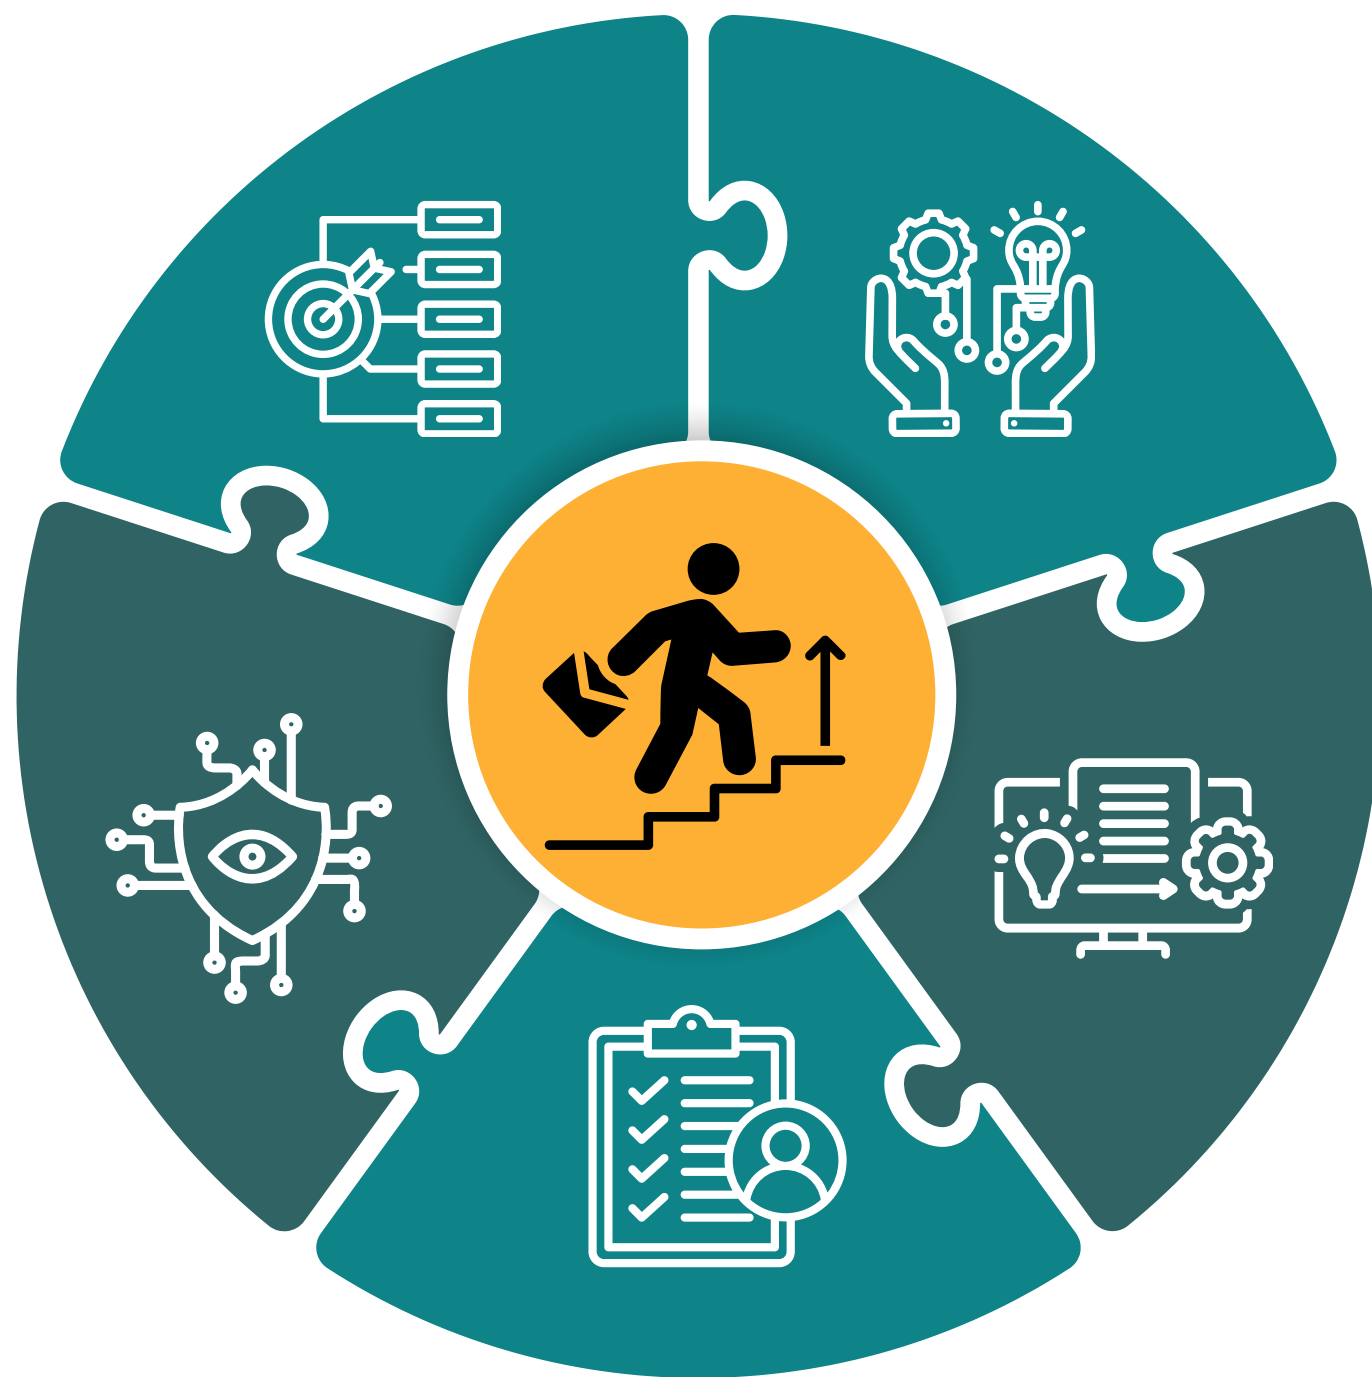

The rise in the price of gems over the last 10 years

- Sapphire: + 180 %
- Emerald: + 230 %
- Ruby: + 300 %
- Tanzanite: + 400 %

GIA laboratories – introduction, cooperation, guarantee

Gemological Institute of America (GIA)

The world's most prestigious gemological laboratory, founded in 1931, has branches and laboratories all over the world.

Authenticity and quality guarantee

Each stone has a clearly defined origin and characteristics – cut, colour, clarity and carat

Gemstones by Sosna Gems

They are always certified and subject to professional assessment

GIA Certificates

Highest credibility, expert opinion, detailed documentation

GIA – INFORMATION AND PRESTIGE

Founding and tradition

The GIA was founded in 1931 in the USA and has set the standard in gemology for almost a century.

4C System

It was the first to introduce diamond grading by cut, colour, clarity and carat weight, pioneering the grading of other gemstones

Worldwide coverage

GIA's laboratories and offices operate across all continents, providing a wide range of verification and independent assessment capabilities

Scientific research

He is intensively involved in gemological research and contributes to the discovery of new information about the origin and properties of gemstones

The prestigious standard

GIA certification is considered the gold standard in the industry and gives gems high credibility in the global marketplace
